Philippines

## RECOMMENDATIONS:

The product has been evaluated in the Philippines and the following are the recommendations:

PESTS	REMARKS
Cockroaches	Mix 20 ml <b>CYFLUX 5 EW</b> with 1 lit. of water. Thoroughly spray possible hiding places where pests can occur with 50 ml of spray mixture per m <sup>2</sup> . If hiding places are not directly accessible, spray a barrier around them.
Mosquitoes	Mix 20 ml CYFLUX 5 EW with 1 lit. of water. Spray or mist areas of infestation at a rate of 50 ml per m <sup>2</sup> /cubic meter.
Stored product insects	Mix 20 ml CYFLUX 5 EW with 1 lit. of water and spray evenly at a rate of 50 ml per m <sup>2</sup> .

## DIRECTIONS FOR USE:

**CYFLUX 5 EW** is recommended for control of cockroaches, mosquitoes and stored product insects. For the purpose 20 ml of the insecticide is diluted in one litre of water and sprayed at a dose of 50 ml per m<sup>2</sup>, particularly in cracks, crevices and other hiding and resting surfaces.

The product can also be effectively used in areas such as houses, dwelling places, commercial premises, restaurants, railways, industrial premises, offices, hospitals, livestock farms, ships and stored product bags, etc.

## STORAGE AND CONTAINER DISPOSAL:

Store away from food, drink or animal feeding stuff. Store below 30 C. Keep away from heat or moisture.

Do not re-use container, Completely empty the contents and bury the unused chemical together with the crushed container at least 45 centimeters deep in an isolated location away from water supplies.

**KEEP OUT OF REACH OF CHILDREN. USE ONLY AS DIRECTED.**
