

STABILITY OF DELTAMETHRINE

Novicide

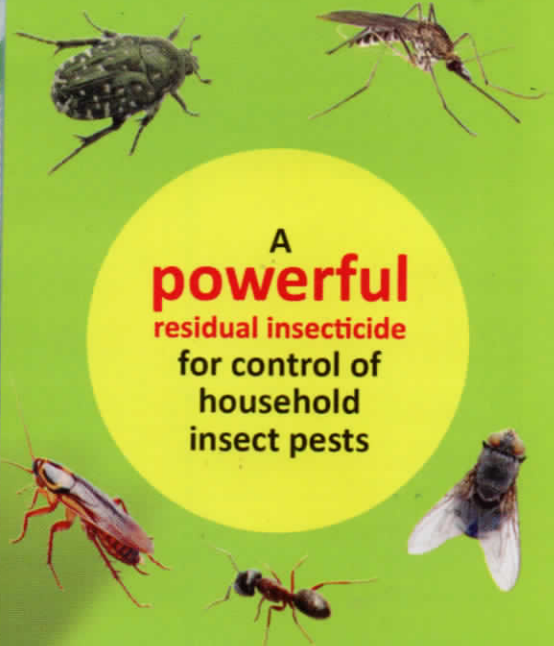

DELUGE¹ SC

Deltamethrin is one of the most common insecticide used the world over to control public/household pests such as cockroaches, flies, mosquitoes, ants, ticks, mites & others.

DELUGE with 10 gm per litre Deltamethrine HAS MANY ADVANTAGES:

1. **DELUGE** is specifically formulated to carry all the Deltamethrin properties in it.
2. **DELUGE** easily mixes in water to make a uniform solution.
3. **DELUGE** is odorless and is recommended for indoor application.
4. **DELUGE** binds strongly with solid surface to remain active for a longer residual effect.
5. **DELUGE** can be used for bed net impregnation requirements.
6. **DELUGE** comes with easy packaging for the most economical use.

A
powerful
residual insecticide
for control of
household
insect pests

HOW DELUGE WORKS:

Deltamethrin in Deluge is a Type II synthetic pyrethroid and targets the insect's nervous system. It causes pronounced convulsive phase within seconds of dosing. Insect becomes uncoordinated and death follows.

DELUGE IS ENVIRONMENTALLY SAFE • DELUGE IS TESTED & PROVEN

DELUGE PROTECTS AGAINST ALL PESTS

INFORMATION & DIRECTION

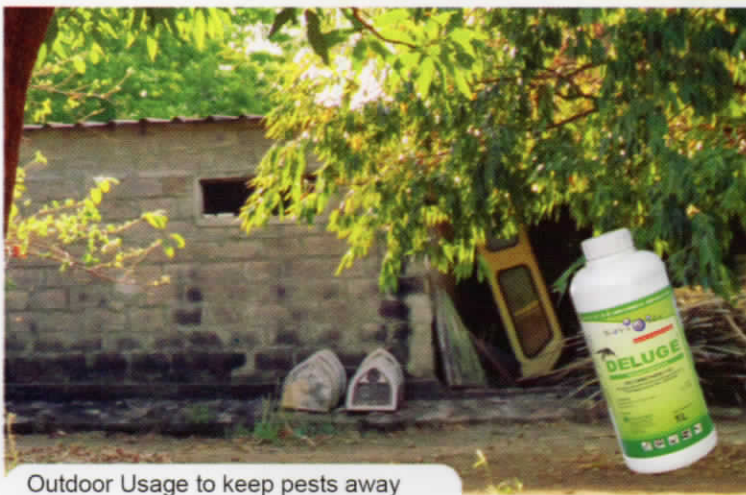

DELUGE 1 SC is a broad spectrum insecticide for effective control of all household pests such as cockroaches, flies, mosquitoes, ants, mites and ticks etc.

DELUGE 1 SC is for use in food processing establishments, industrial and commercial premises, homes, hotels, restaurants, offices, hospitals, ships, aircrafts, warehouses, refuse dumps and other areas.

DELUGE 1 SC is used both for indoor and outdoor requirements using a compressed air sprayer.

DIRECTIONS FOR USE:

DELUGE 1 SC is mixed at the rate of **20** ml per 1 liter of water. The mixture is stirred to give a homogeneous mixture. The mixture is then sprayed on walls, doors, baseboards, edges of walls, cracks and crevices, areas of pest hideouts and places where pests tend to pass. Mixture can be used directly on pests as in breeding places such as garbage dumps, drainage systems, floor and grease traps. **DELUGE 1 SC** can also be used for bed net impregnation. Mosquito bed nets can be dipped in **DELUGE 1 SC** mixture prepared at the rate of 40 ml of Deluge per 1 liter of water. The net is left for soaking for 30 minutes and then air dried before use.

Outdoor Usage to keep pests away

Indoor Usage to eliminate pests

Pests / Treatment	Dilution	Direction
Mosquitoes	20 ml/L	Apply in stagnant water pools, outside and inside walls, old tires and areas where mosquitoes rest.
Mosquito Bed Nets	40 ml/500 ml (synthetic nets) 40 ml/2 L (cotton nets) 30 ml/L	Bed nets can be dipped in Deluge 1 SC mixture prepared at the rate of 40 ml of Deluge per 500 ml of water. The net is left for soaking for 10 minutes and then air dried before use. Use a lower dilution for cotton nets.
Houseflies & other flies	20 ml/L	Apply directly on breeding areas such as garbage cans, dump sites, also areas where adult flies rest.
Cockroaches/Bedbug	20 ml/L	Apply on areas of hideouts, along baseboards, walls, cracks and crevices and areas of passage and shelter.
Ants	20 ml/L	Apply directly on ant trails, areas of harborage and colonies.
Fleas, Ticks and Mites	20 ml/L	Apply on areas of harborage such as cracks on walls and floors. Infested pets or birds can be shampooed under vet supervision.
Stored product beetles	20 ml/L	Apply on storage bins, tarpaulins, along the edges of silos, walls of warehouses, cracks on floors and all areas of harborage.
